

PMS Data Maturity Model

PMS Reliability – Small Sprints

PMS data review using various smart tools

Small and big projects planning and updates

Jobs spread analysis and clean up

PMS data reliability also depends on the small ad-hoc tasks like:

- Updating the inventory / ROB
- Creating new regulation jobs – Service Letters / Changes in interval / MLC / BWM
- Creating Class related jobs – Inspections / CoClass / Hull and Machinery Surveys
- Creating new spares – machinery replaced / equipment supplied or installed

Technologies used:

Compliance!

The Hong Kong International Convention for the Safe and Environmentally Sound Recycling of Ships, 2009

(the Hong Kong Convention), was adopted at a diplomatic conference held in Hong Kong, China, from 11 to 15 May 2009, which was attended by delegates from 63 countries.

Besides many other guidelines, one guideline which we need to start thinking about and start working on:

2015 Guidelines for the development of the **Inventory** of the Hazardous Materials, adopted by resolution **MEPC.269(68)**.

Some Examples Of The Work Done

After packing and labelling

Shafts with protective packing

Filters with label and packing.

Some Examples Of The Work Done

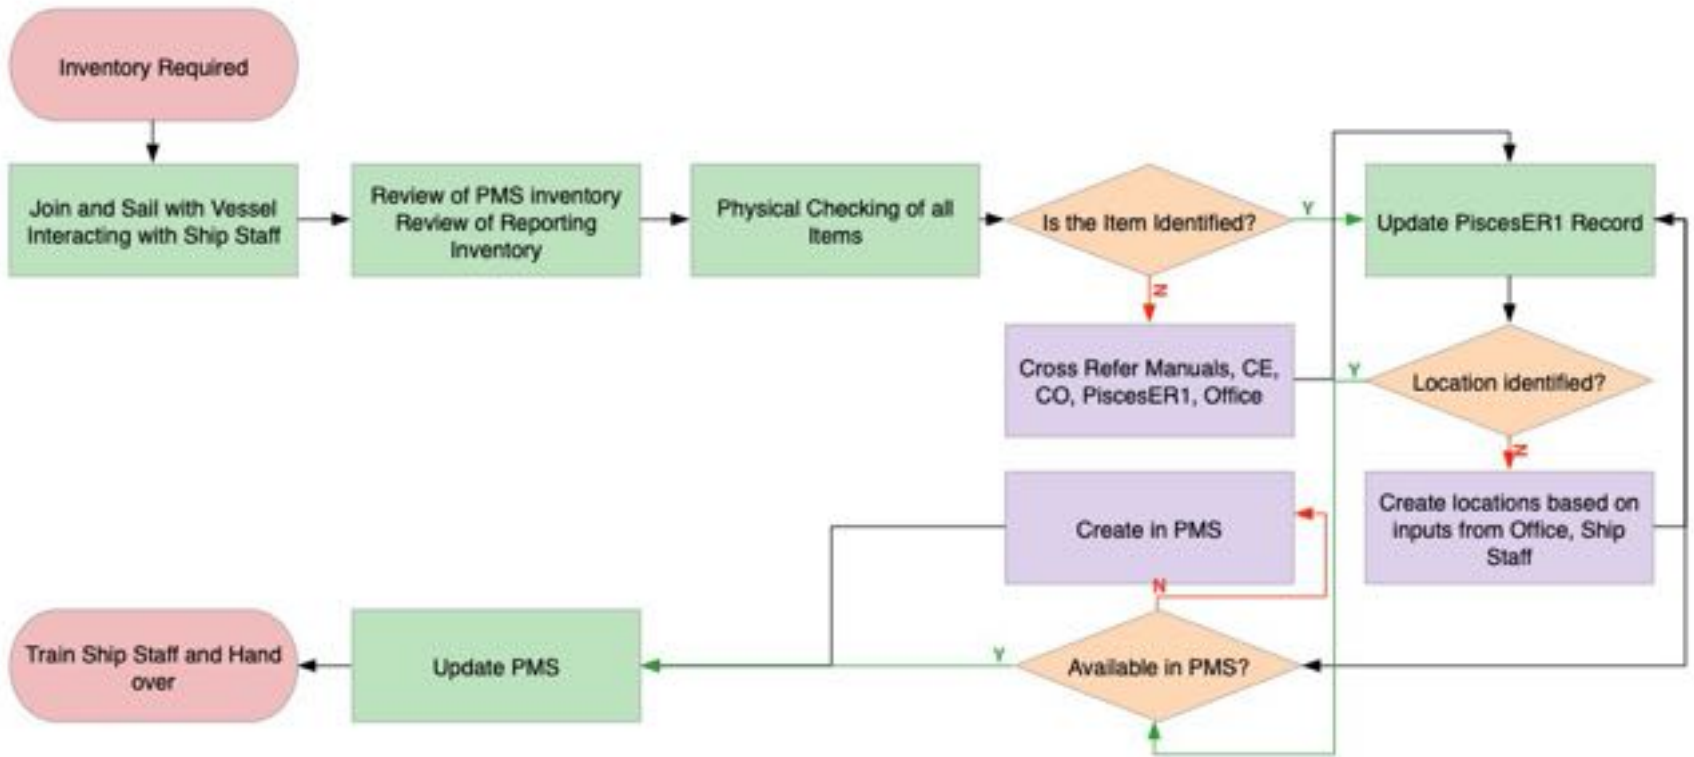

Indexing the spares for easy identification

Packing, labelling and placing it on respective place

Process and Challenges

Packing, Labelling, Barcoding, Arranging done as required

Case Study of Recovery Value – Estimated Work

Details	Customer 1 – Bulk Carrier	Customer 2 – Very Large Gas Carrier
Inventory update leading to cancellation of existing requisitions	4 nos	2 nos
Major Jobs pending due to spares missing	AE T/C overhauls all 3	One ME Unit decarb
Number of items that were 'discovered' and updated	2 sets of AE T/C kits	1 set of piston rings
Work that can be carried out due to 'discovered' spares	2 out of 3 pending jobs	1 out of 1 pending job

The estimation is done based on inputs from

- ship staff
- checking the PMS system
- communication with office

Case Study of Recovery Value – Estimated Dollars

Details	Customer 1 – Bulk Carrier	Customer 2 – Very Large Gas Carrier
Total Number of Spares Identified by our team	4000 items	8000 items
Approx. percentage of items that were not recorded in PMS / Inventory	20%	25%
Number of items that were 'discovered' and updated	800	2000
Estimated Recovery Value for the 'discovered' items	40,000/- USD	100,000/- USD

The estimation is done with approximate average of **USD50/-** per spare part.
The individual numbers of ROB are not taken into these calculations.

PiscesER1 – PMS Audit and Improvement

After discussion and approval of the Improvement Plan we will do the Clean-Up of the PMS

Case Study of one of the vessels

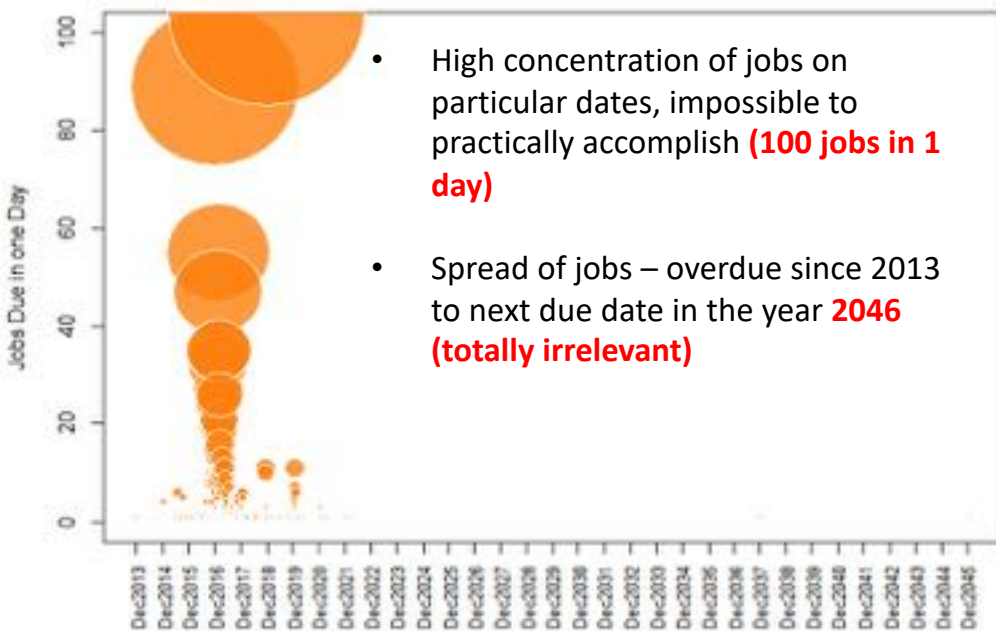

Multiple Jobs of same interval to same component – **about 200 extra jobs**

328 Jobs for 139 Components
